

## ICE EATER STAND ASSEMBLY INSTRUCTIONS

Lay the frame assembly on the floor (without the legs) and slide the two swivel brackets into the top of the frame.

Lay the Ice Eater horizontal to the floor in between the two swivel arms, mark your holes, and drill. All you want to watch is that you clear the motor brackets on the inside of the shroud, clear your powercord, and get it centered front to back.

Insert bolt and place washer with lock nut on the inside and tighten.

If you have any questions please call Mallard View Outdoors at 270-274-0025 or Josh at 270-256-7574.
